Subject: Off-Site Ditch Investigation
LCP Chemicals, Inc. Superfund Site (USEPA ID# NJD079303020)

Dear Mr. Gorin:

We are pleased to provide you the results of the investigation of sediment and surface water in the two Off-Site Ditches located adjacent to the LCP Chemicals, Inc. Superfund Site. It is intended that the formal presentation of these results will be included in the final submission of the Remedial Investigation Report (RIR). Accordingly, the draft results of the Off-Site Ditch investigation are presented as inserts and revisions to the Draft RIR, dated September 2008. The attached report includes the RI report text with new or modified material highlighted in the relevant sections to indicate where material has been inserted. Newly created attachments, drawings and tables, or those modified from the original draft RIR for this work are also attached. Attachments, drawings, and tables unchanged from the original draft RIR are not included. In addition, revisions have not been made to the original draft RIR to address previous EPA comments. These revisions will be made and incorporated into the Final RIR.

Please contact Dave McNichol at IES if you have further questions or comments.

Very truly yours,
Brown and Caldwell
